A. P. Shikhverdiev, Chairman of the organizing Committee of the scientific-practical conference Doctor of Economics, Professor, Academician of the Russian Academy of Natural Sciences

A. A. Vishnyakov, Deputy Chairman of the organizing Committee of the scientific-practical conference Ph. D., Associate Professor

December 2-03, 2020 FSBEI HE “Syktvykar State University named after Pitirim Sorokin” together with the Federal State Budgetary Scientific Institution Federal Research Center “Komi Scientific Center of the Ural Branch of the Russian Academy of Sciences” and the Institute for Integrated Arctic Research Federal State Budgetary Institution “Federal Research Center for the Comprehensive Study of the Arctic named after Academician N. P. Laverov of the Russian Academy of Sciences” and the “Institute of Economics of the Ural Branch of the Russian Academy of Sciences” with information support of the journal “Corporate Governance and Innovative Development of the North Economy: Bulletin of the Research Center for Corporate Law, Management and Venture Investment of Syktvykar State University named after Pitirim Sorokin” hold the All-Russian (with international participation) scientific-practical conference “Mechanisms of sustainable development of the North and the development of the Russian Arctic in the context of digital transformation.”

The conference will address fundamental scientific problems related to the lack of effective mechanisms for sustainable development of the North and the development of the Arctic in the conditions of digital transformation.

The Plenary Session will consider the main mechanisms for sustainable development of the North and the development of the Russian Arctic in the conditions of digital transformation, among others:

- the role of small and medium business in the sustainable development of the North and the exploration of the Arctic;
- social and environmental responsibility of business in the Arctic zone of the Russian Federation;
- migration factors for the sustainable development of the northern and Arctic regions of Russia;
- financial aspects of sustainable development of the North and the development of the Arctic.

The breakout sessions will be considered:

A). The role and place of the state in sustainable development of the North and integrated development of the Arctic. The issues of investment activity and attractiveness of the regions of the North and the Arctic will be considered. The problems of complex socio-economic development of northern and arctic monocities will be discussed. Systemic problems of transport infrastructure development in the Arctic zone of Russia will be analyzed.

B). Financial Aspects of Sustainable Northern Development and Arctic Development. Specific features of autonomous models and forms of self-organization of local community finances in remote areas of the North and the Arctic will be discussed. It is planned to consider the impact of sustainable financing institutions and instruments on regional development. Special attention will be given to improving the efficiency of financial solutions for the development of sustainable infrastructure and tax incentives for investment activities in Russia's Arctic regions. The role of the budget system in increasing the competitiveness of the economies of northern regions of Russia and other issues of improving the quality of the financial system, taking into account the specifics of the North and the Arctic, will be considered.

C). Development of entrepreneurship in the Far North and the Arctic. The problems of ensuring social and environmental responsibility of business will be discussed. The role of digital technologies and project management in entrepreneurship development in the Northern and Arctic territories will be considered. Issues of tourism development in the Far North and Arctic conditions will be discussed as a separate block.

D). Problems of migration, personnel policy and improving the quality of life of the population of the Arctic regions of Russia. Factors and mechanisms of mutual influence of migration processes and the dynamics of socio-economic development of the Arctic regions of Russia are supposed to be discussed. Issues of ensuring the quality of life in the North will be considered. It is planned to consider issues of personnel policy and education, socio-economic situation of the population in the North and the Arctic as a separate block.

E). Socio-cultural and spiritual aspects of northern development and Arctic exploration. Problems and prospects for the development of small indigenous minorities of the North and the Arctic will be analyzed. The ethnocultural component of sustainable development of northern peoples in the education system will be analyzed separately.

The relevance of the event's theme is to discuss, develop, within the framework of the All-Russian (with international participation) scientific and practical conference, mechanisms for the sustainable development of the Russian North and the Arctic under conditions of digital transformation, develop theoretical and methodological approaches and methodological tools to ensure sustainable development of the North and the development of the Russian Arctic.

The importance of the proposed event is that the solution of these issues will provide an opportunity to gain new scientific knowledge about the mechanisms of sustainable development and development of the northern and Arctic territories of Russia in modern conditions, given the particular vulnerability of the northern and Arctic territories, their special significance for the breakthrough development of Russia.

The following areas, which will be considered at sectional meetings of the conference, are of particular importance in the sustainable development of the North and the development of the Arctic from the point of view of forming new and developing existing directions:

- the role of the state and effective corporate governance, infrastructure development and investment attractiveness in the sustainable development of the North and integrated development of the Arctic;
- financial aspects of sustainable development of the North and development of the Arctic;
- development of entrepreneurship, and ensuring the social and environmental responsibility of business in the Far North and the Arctic;
- factors and mechanisms of mutual influence of migration processes and the dynamics of socio-economic development of the Arctic regions of Russia;
- socio-cultural and spiritual aspects of the development of the North and the development of the Arctic, as well as problems and prospects for the development of the indigenous peoples of the North and the Arctic.

During the conference, fundamental scientific problems of the sustainable development of the North and the development of the Arctic will be considered, namely:

The role and place of the state in the sustainable development of the North and the integrated development of the Arctic. Issues of investment activity and attractiveness of the regions of the North and the Arctic. Problems of integrated socio-economic development of the northern and Arctic single-industry towns. Systemic problems in the development of transport infrastructure in the Arctic zone of Russia.

Financial aspects of sustainable development of the North and development of the Arctic. Problems of autonomy and self-organization of finance of local communities in the conditions of remote territories of the North and the Arctic. Issues of the impact of institutions and instruments of sustainable financing on regional development. Problems of increasing the effectiveness of financial decisions on the development of sustainable infrastructure, tax incentives for investment activity in the Arctic regions of Russia. The role of the budget system in improving the competitiveness of the economies of the northern regions of Russia. Ensuring the quality of the functioning of the financial system, taking into account the specifics of the North and the Arctic.

Entrepreneurship development in the Far North and the Arctic. Problems of ensuring social and environmental responsibility of business. The role of digital technology and project management in the development of entrepreneurship in the northern and Arctic territories.

Problems of migration, personnel policy and improving the quality of life of the population of the Arctic regions. Factors and mechanisms of mutual influence of migration processes and the dynamics of socio-economic development of the Arctic regions of Russia. Issues of ensuring the quality of life in the North.

Socio-cultural and spiritual aspects of the development of the North and the development of the Arctic. Problems and prospects of development of indigenous peoples of the North and the Arctic.
